D STRIKES IN MONTANA'S NEW

Emays, July 22.—A. M. Holter of Helena and others have made a big strike of copper ore in the Copperopolis district. This is the largest body of copper ore so far struck in that booming camp. There is two feet at one side and three feet at the other of a mixture of native silver, red oxide, copper glance and asurite. The find was made at a depth of sighty feet.

Two carloads of high-grade copper ore have been shipped from the Anaconda mine on the Big Blackfoot. The ore runs over 1125 a ton in gold, silver and copper. The capacity of the Horr coke plant in

E. D. Baker of the Cherry Hill quartz mine in Siskiyou county has organized a company in New York with \$1,000,000 capital to develop his mine on an extensive scale.

At the head of Dutch and Empire creeks on Virginia bar district, Siskiyou county, C. B. Poole and Carl Ericksen have discovered a rich gold and copper ledge which will yield handsomely. As there is fine timber near by it is probable a spur track from the railroad will be built.

It is probable a spur track from the railroad will be built.

The record for cheap milling of ore is broken by the mill at the Spanish mine near Washington, Nevada county. The milling costs are 23.9 cents a ton and the mining 34.6 cents a ton, making a total of 58.5 cents a ton. When it is said that at the Treadwell mill at Juneau, Alaska, it costs \$1.47 a ton for milling and mining, the achievement of this Nevada county mill may be appreciated. The mill is capable of working up 3.500 tons a month.

In the Alpine mine near Washington ranch, Calaveras county, ribbon rock has been struck twenty feet below the surface that will mill \$125 a ton. The ledge is four and a half feet wide, of which twenty-two inches are very rich.

NEVADA. RENO, July 23.—The Reno Smelting and Milling Company was recently sold to the Empire Copper Mining and Milling Company, which will put the plant in good shape and work the smelter in custom ores. It is also expected to work the Pyramid mine ores. The Reno Reduction Works have also been overhauled and are ready for business. It now looks as though these local mills will work up the thousands of tons of ore which have been shipped through here to foreign smelters.

All the copper claims adjoining their property in Lincoln county have just been bought by the Bristell Copper Mining Company for \$150,000 and a percentage of company stock.

Eighteen miles northeast of the Comstock lode a large body of copper ore has been found that bears a striking similarity to the ore found at Keswick in Stark county, Cal., that has proved to be so rich. The cap rock over the vein is identical with that in northern California. One of the lessees of a bonanza claim at Tonaph is taking out \$1,000 a day. So great is the demand for teams for moving ore to the railroad that many miners can get no one to haul their ore.

The Lagerbeer mine in the Silver City district, Lyon county, has produced in the last six months \$35,000 in gold bullion. This all came from a high-grade "chimney," but there is an abundance of \$11 ore left.

Topiani, an Italian woodchopper, has struck a good quartz ledge at Cherry Creek, White Pine county. In filling a contract for 500 cords of wood for the Glasgow mine he had to locate a claim and sink ten feet. Immediately under the surface he struck a ledge showing gold plentifully and this has continued to a depth of sixty-five feet. If it pans out according to appearances Topiani will not have to do any more woodchopping.

They are on their way to British Columbia where they own the Queen's Head group of eight mines which control Silver Mountain. It is said. contains the greatest silver deposit known. For four years the shipments have averaged \$109.72 a ton.

The Telluride Reduction Company has purchased 120 acres at Colorado City and will erect a bromide mill at once. It will cost \$100.000 and will employ 300 men. Colorado City is the site of the Colorado-Philadelphia and the American, both big mills; also of the Portland mill now building. Canon City, Florence, Leadville, Denver and other cities were competitors. The company is composed mainly of New York capitalists. The bromide process is adapted to low grade ores. It is an experiment. The plant will be so constructed that it can be changed readily to a cyanide mill.

The El Paso mill at Florence, which was burned on Tuesday, may be removed to Colorado City. It cost \$300,000. The fire was probably incendiary.

Interest in copper mining in Fremont county has been revived by recent developments in Cotopaki mine.

The Denver branch mint's record for the fiscal year just closed was: Receipts, \$18.-187.117.58 against \$17.043.065.72 last year a gain of \$1,143,421.86. Much Colorade gold is deposited in New York and Philadelphia; hence the Denver showing is not complete. At \$5 feet depth the Bouzai shart on Sduaw Mountain has encountered aluminum, the per cent being 45. This is a new development for the camp.

On Monday dividends were disbursed by the following Cripple Creek companies: Portland, \$180,000; Modoc, \$5.000; Gold Coin. \$30.000: New Zealand consolidated. \$7.650; Consolidated Gold Mines. \$19.000.

REATTLE, July 22.—Wining operations on the Bluestone and its tributaries are now reported in full swing under favorable conditions. The same report also comes from Kongarok, where the season is over a month late, the first provisions being landed there from the Kimbeil on July 4. Lumber for building and fluming purposes s now plentiful, and there is nothing to prevent active operations.

The Nome beach has again proven a bonanza to the miners who preferred to work while they waited for the snow to get out of the creeks. Although the ground had been gone over several times within the past two years, good pay was still obtainable and many were enabled to make cuite a stake. The snow is now going rapidly and the rish of miners to the creeks is at its height. Five thousand miners from Dawson have joined in the rush to the mines since the ice flow left the mouth of the Yukon.

SEATTLE, July 22.—The c. sl mines at Michel and Ferole, in the Crow's Nest country, are now employing 900 men in working the mines and making coke. The output is now 1,500 tons daily and will be increased very materially later in the season. The Crow's Nest Southern Railway, which is under construction, will open up a new market for the coal in Eastern Washington and northern Idaho. It is expected that this line will be in active operation by Jan. 1. The coal industry of this part of the province will hardly he second to that of copper-gold within the next few years.

In Rossland district the -miners' strike has closed the mines end suelters for an indefinite period, and where all was seemingly prosperity and happiness a month ago, is now idleness and uncertainty. SEATTLE, July 22.—On Railroad Creek, Chelan district, eighteen miles from Lake Chelan, a well-defined vein of molybdenite is under development. The vein is a feet in width and is traced for 300 feet, being highly mineralized throughout. Two tunnels have been driven on it, one 30 feet, the other 150 feet, opening up workable bodies of ore. Several shipments have been made and the owners say that they have realized 75 cents a pound for it, the purchasers being Eastern iron manufacturers. It is used in the hardening of plates. A railroad is now being graded from the lake to the mine and a smelter is contemplated.

Expert examination is being made of the tin deposits in Mason county, a short distance from Seattle. These deposits have been worked for several years in an indifferent manner by men possessing little knowledge of the metal or the manner of handling it. By persistent effort, however, they finally succeeded in attracting the attention of men of capital and experience. The property is within two miles of tidewater and can be worked economically.

During the past week the Columbia and Eastern Railroad has opened up its first section, which penetrates a great mining section lying at the base of Mount Rainier, rich in copper, gold, silver, iron and coal. This section of the country is new very accessible and will be developed rapidly. There is a splendid market for the output of the mines at Tacoma, where the smelter has been enlarged and improved to meet every demand. A new district called the Meteor in the Colville country is attracting considerable attention this summer, 300 prospectors having gone in and made locations. The finds are principally gold and copper. The new railroad from Keller to the Columbia River will pass through this district.

New gold discoveries are being made along the headwaters of the Ential and a large number of caims taken up. This district is on the Columbia, north of Winatchu.

IN THE BLACK HILLS.

ROCHFORD, S. D., July 24.—This portion of the Black Hills is attracting considerable attention at present, owing to its large ledges of low grade free-milling ore. The Standby Mine, which is owned by New York men, is about to resume the breaking of ore. A rich streak of free-milling ore has been encountered in the James Cochran mine, two miles west of Rochford. It is about five feet wide the values running about \$22 a ton gold. The face of the ledge of ore is over 100 feet wide, there being several rich streaks in it. The lowest values run about \$4 a ton.

F. W. Bock and associates of this place, have opened into an immense ledge of iron and gold ore two miles west of this city. The ledge is fully 150 feet wide and its runs about \$5 in gold and 50 per cent. iron.

LEAD, S. D., July24.—The protable purchase of the Rlack Hills and Fort Pierre Railway by the Burlington company is looked upon with general favor by the Black Hills people. It means the openium up of the Homestake belt south of this city. As long at the Black Hills and Fort Pierre read is in the hands of the Homestake company, no effort will be made to call attention to the possibilities of the great belt of ore that extends for twenty-miles or more southward. The road crosses the belt and follows it for some distance. The rich Uncle Sam mine, which is about eight miles south of this city, on what is supposed to be the Homestake belt, is located at the station of Perry, on the Black Hills and Fort Pierre road.

The Hidden Fortune company has announced its plans of opening up the large block of ground north of this city, the old Highland Chief mill is being remodeled into a cyanide plant and the mine will be started up very soon.

G. B. Baldwin & Co. have a force of men at work developing a copper mine a few miles south of Cape Horn. The ore is good in copper and carries some gold.

Cobben & Casey have discovered a ledge near Horseshoe Bend, on Payette River, that is creating considerable excitement among prospectors. The vein is over four feet in width and the ore rich in both lead and gold. There are many other mines in the same district that are opening up well. The Idaho Paraffine Company has struck a little oil in its well on Snake River, fifty miles southwest of this place. The formation now open is supposed to be the very best for oil. Other companies will soon begin sinking wells. A company has also been formed for the purpose of sinking a well a few miles east of Boise, where there is a great amount of black shale.

SALT LAKE, July 22.—To the number of strikes that have followed the reopening of the famous old Honrine of Stockton, has just been added another that is the most interesting, if it does not develop into the biggest and the most productive, of the lot. The ore just discovered consists of a heavy block of galena showing sulphides of silver together with a carbonate of lead, showing sensational values in each.

The management of the Century Mining Company last week reported from its miniature mill in Park Valley a bar of bullion containing 130 ounces of gold, from which the company derived about \$4,000.

A report from Eureka says that in the May Day the management has been encountering pockets of copper-bearing ore resembling that which characterized the great Centennial-Eureka, and that while it appears and disappears in the vein, nothing indicative of a body has yet been encountered.

The past two weeks throughout the La Sal country, southern Utah, has been a record-breaker for new discoveries and a general advancement all round. The biggest showing recently has been made in the "Chimney Sweep."

BRIGHT OUTLOOK FOR GOLF: PLAY THIS WEEK AT HOLLIWOOD AND SHINNBOOCK HILLS.

After a dull July the M. O. A. golfers will probably have a lively August, for the month will begin with tournaments at the Shinnecock Hills and the Hollywood Golf clubs. The Southampton event is for members, subscribers and their guests, who will meet in an eighteen-hole qualifying round on Thursday morning, the three lowest sets of eight to begin match play in the afternoon for cups, the final rounds and a handleap being played on Saturday. The entries, which close at the clubhouse on Wednesday night, will include George C. Clark, Jr., A. M. Brown, U. A. Murdock, Jr., and the best of the resident players, while among the subscribers and guests will probably be numbered H. B. Hollins, Jr., R. C. Watson, Jr., E. S. Knapp and Charles H. Seeley. The entries for the "all comers" tournament of entries for the "all comers" tournament of Friday and Saturday at Hollywood close on Tuesday, with Secretary O'Donohue at 101 Front street. The advance entry of the professionals indicate that a good name for the tournament would be the "Intercity." Chicago has in Will Smith and David Bell; Boston, Bernard Nichols, "Nipper" Campbell, Aleck and Dave Findlay; Philadelphia. James Campbell; Atlantic City, John Reid; Pittefield, Will Anderson, the open cham-Pittsheid, Will Anderson, the open champion; Newburgh, Robert Dow, and Cleveland, W. H. Way. The New York corps will all rally round the tee. Findlay S. Douglas and F. W. Menzies head a list of some twenty amateurs who have entered. It would be in keeping with the intercity aspect of the tourney if A. G. Lockwood, who is now on his best game, should come on from Boston. What a team Douglas and Lockwood would make for the four-ball match!

Some gossip of the travelling golfers is contained in a letter from John M Ward received last week by Mortimer M. Singer. At Troon, with Mesers. Travia, Tappin and Jewett, Ward was entertained by W. Cirdwood Stewart, who made so many friends here during his golfing tour of 1897. Stewart, with the active aid of Willie Fernie, saw to it that the Americans received every opportunity to play. The visits to Prestwick, North Berwick and St. Andrews were equally enjoyable. "Tell the boys at Fox Hills to shiver," wrote Ward of his own game, "for I have played with Old Tom at St. Andrews and at Prestwick. In spite of the dreade 'Himalayas' and the 'Cardinal,' I made an 85.

Programmes are out for the seventh annual open tournament of the Otsego Goif Club, to be held on the Cooperstown course on Aug. 5, 8 and 7. From the choice of dates it may be supposed that the open tournament of the nearby Wajontha Goif Club, of Richfield Springs, will fill up the week as it did last year. The qualifying round will be at thirty-six holes, with a gold medal for the best score, the three lowest sets of eight to qualify respectively for the Cooperstown, Otsego and Consolation cups. All the match play rounds will be at eighteen holes. There will be an eighteen-hole medal play handicap on the last day, with a cup for the lowest net score. The Tournament Committee consists of Leslie Pell-Clarke, William Festus Morgan and S. C. Clark. The entries closed with Mr. Clark on Aug. 3, at Cooperstown who will answer all inquiries in regard to hotel accomodation, &c.
